
Final Agreed Roles

1. ADMIN (Includes Sales)

Owns:

- Enquiry
- Feasibility
- Quotation
- Sales Order
- Customer management
- User management
- System settings
- Reports
- Tally integration

Only Admin can:

- Create/Edit/Delete users
- Change role permissions
- Access system configuration

2. STORE (Includes Dispatch)

Owns:

- RM Control Center
- Material Availability
- Material Issue
- Stock Management
- Dispatch
- Sales Bills
- Customer Returns
- Job Work

Can:

- Create/Edit operational masters
- Access operational reports

Cannot:

- Create users
- Change role permissions

3. PURCHASE

Owns:

- Procurement Workspace
- RM Purchase Orders
- Vendor Management
- Purchase Planning
- Purchase Bills

Can:

- Create/Edit purchase-related masters
- Access purchase reports

Cannot:

- Create users
 - Change role permissions
-

4. PRODUCTION

Owns:

- Work Orders
- Production Planning
- Production Entry
- Production Monitoring

Reports:

- Plan vs Actual
 - OEE
 - Production Efficiency
-

5. QA

Owns:

- QA Entry
- Rejection Approval
- Rework Decisions
- Hold Decisions
- Scrap Notes

Reports:

- Rejection Analysis

- Scrap Analysis
 - Cost-wise Rejection
 - Top Rejection Contributors
-

One Important Recommendation Before Implementation

Instead of giving Store and Purchase unrestricted master access, split masters into categories.

System Masters

Only Admin

Examples:

Users

Roles

Permissions

System Settings

Number Series

Operational Masters

Store + Purchase + Admin

Examples:

Items

RM Items

FG Items

Suppliers

Customers

Units

HSN

GST

BOM

This is much safer.

Otherwise Purchase can accidentally modify something unrelated to procurement, and Store can accidentally modify commercial masters.

Final Structure to Freeze

users

1. ADMIN (includes Sales)
2. STORE (includes Dispatch)
3. PURCHASE
4. PRODUCTION
5. QA

This structure aligns as per your requirements. Please approve it so we can process further.
