

MPRS Final Validation Questions

1. Emergency Demand

Suppose MPRS is already locked for June.

Customer suddenly sends an urgent requirement:

Normal demand = 10,000 pcs

New urgent demand = 50,000 pcs

What should happen?

A) Wait for next MPRS revision.

B) Store can create an Emergency Procurement Request immediately.

C) Purchase can directly raise emergency procurement.

2. Supplier Delay

Material was already planned in MPRS.

PO issued.

Supplier delays delivery.

WO is waiting for RM.

What should be the preferred action?

A) Wait for supplier.

B) Store reallocates stock from another WO.

C) Purchase arranges alternate supplier.

D) Combination of above (please specify priority).

3. Partial GRN

MPRS required:

ABS = 10,000 KG

Supplier delivers:

ABS = 4,000 KG

Should Store:

A) Allocate available quantity to highest priority WOs.

B) Wait for complete receipt.

4. Safety Stock Usage

When actual stock falls below Safety Stock:

Should Safety Stock be:

- A) Untouchable buffer.
 - B) Allowed for emergency production.**
 - C) Allowed only with Store approval.**
-

5. Alternate Material / Alternate Supplier

If planned RM is unavailable:

Can Store/Purchase use:

- A) Approved alternate supplier.**
 - B) Approved alternate material grade.**
 - C) Not allowed without approval.
-
